

NATURAL · ESSENTIAL · TIMELESS

100% pure

Pure, crystal-white, natural desert salt, just as it existed when traded ounce for ounce for gold 8 000 years ago.

Sundried, unrefined, no additives

As nature intended – no additives, no anti-clumping agents, no preservatives. Unrefined and unprocessed. Dried by the desert sun.

From an ancient & pristine source

The ancient Dwyka rock formations, through which the underground streams flow, are geo-scientifically tested to be 250-300 million years old. The saltpan is situated in the pristine and remote Kalahari Desert, which spans an area over 2.5 million km².

Loved by international chefs

Oryx Desert Salt has a unique and exceptional taste, which enhances and enriches the flavour of your food. Chefs from around the world taste the difference.

Contains vital minerals & trace elements

Oryx Desert Salt has all the essential minerals and trace elements that exist naturally in salt, including magnesium, zinc and potassium. It provides your body with the correct balance of these minerals, as nature intended, so they can be utilised and absorbed for optimal vitality and health.

Sustainable & renewable

The streams converge in an ancient underground lake, from which the salt water is drawn, laid on the pan under the hot Kalahari sun, sun-dried and packed in bags. This process lives in harmony with the natural rainfall and the surrounding environment. We only extract what nature provides.

Giving Back

We believe in giving back to the community, so for every bag of salt sold, a percentage is donated to the Khomani San and Mier communities who own !Xaus Lodge in the Kgalagadi Transfrontier Park in the Kalahari Desert. For more information visit www.tfpfoundation.org.
